

Draw your favorite animal

3rd-4th grade

This Research Booklet belongs to:

I will be a Junior Scientist today!

On my visit to Loveland Living Planet Aquarium

- I will:**
- use an indoor voice.
 - stay with my adult leader at all times.
 - use two gentle fingers to touch the animals in the touch tanks.
 - have fun!

- I will NOT:**
- write on the glass.
 - run, jump or climb.
 - tap or bang on the glass.
 - use flash photography near the octopus.
 - bring food or drinks into the galleries.

Find the hidden animal names.

COCKROACH	SALAMANDER	ANEMONE	PENGUIN
TOUCAN	BULL FROG	URCHIN	
ARAWANA	PIRANHA	CORAL	
DARTFROG	TROUT	TURTLE	
TARANTULA		SHARK	
		SEASTAR	

Ocean Explorer

Discover Utah

Penguin Research Station Journey to South America

Draw a line to connect each box of
animals to their gallery.

Observe the Gentoo Penguins.

List **two** adaptations that help them to survive in the **frigid** water.

Observe the Upside-Down Jellies.

Which of the following do they not have? (circle one)

Brain Heart Lungs

Blood Bones Teeth

Animal Observations

Observe the Northern Leopard Frogs and Tiger Salamanders.

List 3 things in common between these two animals.

How are Reptiles different from Amphibians?

Find 2 endangered species. Where are they found in Utah?

Exploring Environments

Look at the Shark exhibit.

Record one non-living thing in the sharks environment. How would the animal interact with it?

Look at the Sea horses

How can they stay in one place if there is a strong current?

Does the male or female give birth to the babies?

Adaptations

Take a walk through the rainforest.

Do the trees around you grow in Utah? Why or why not?

What about the birds? Can you find the same birds in the rainforest that you would see in Utah's natural environments? Why or why not?
