

The deep sea has some crazy creatures! One of these is the Hagfish, which Scarlet met on her adventure. This animal lives on the ocean floor eating things that fall to the bottom. The hagfish creates slime to help it live in its home.

Follow these directions to make your own slime;

Mix $\frac{1}{2}$ cup of cornstarch with a two table spoons of hair conditioner. You can add more cornstarch if it's too wet or more conditioner if it's too dry. Use food coloring to make it any color you want!
