

A-MAZE-ing Stingray Camouflage

Discover Stingrays

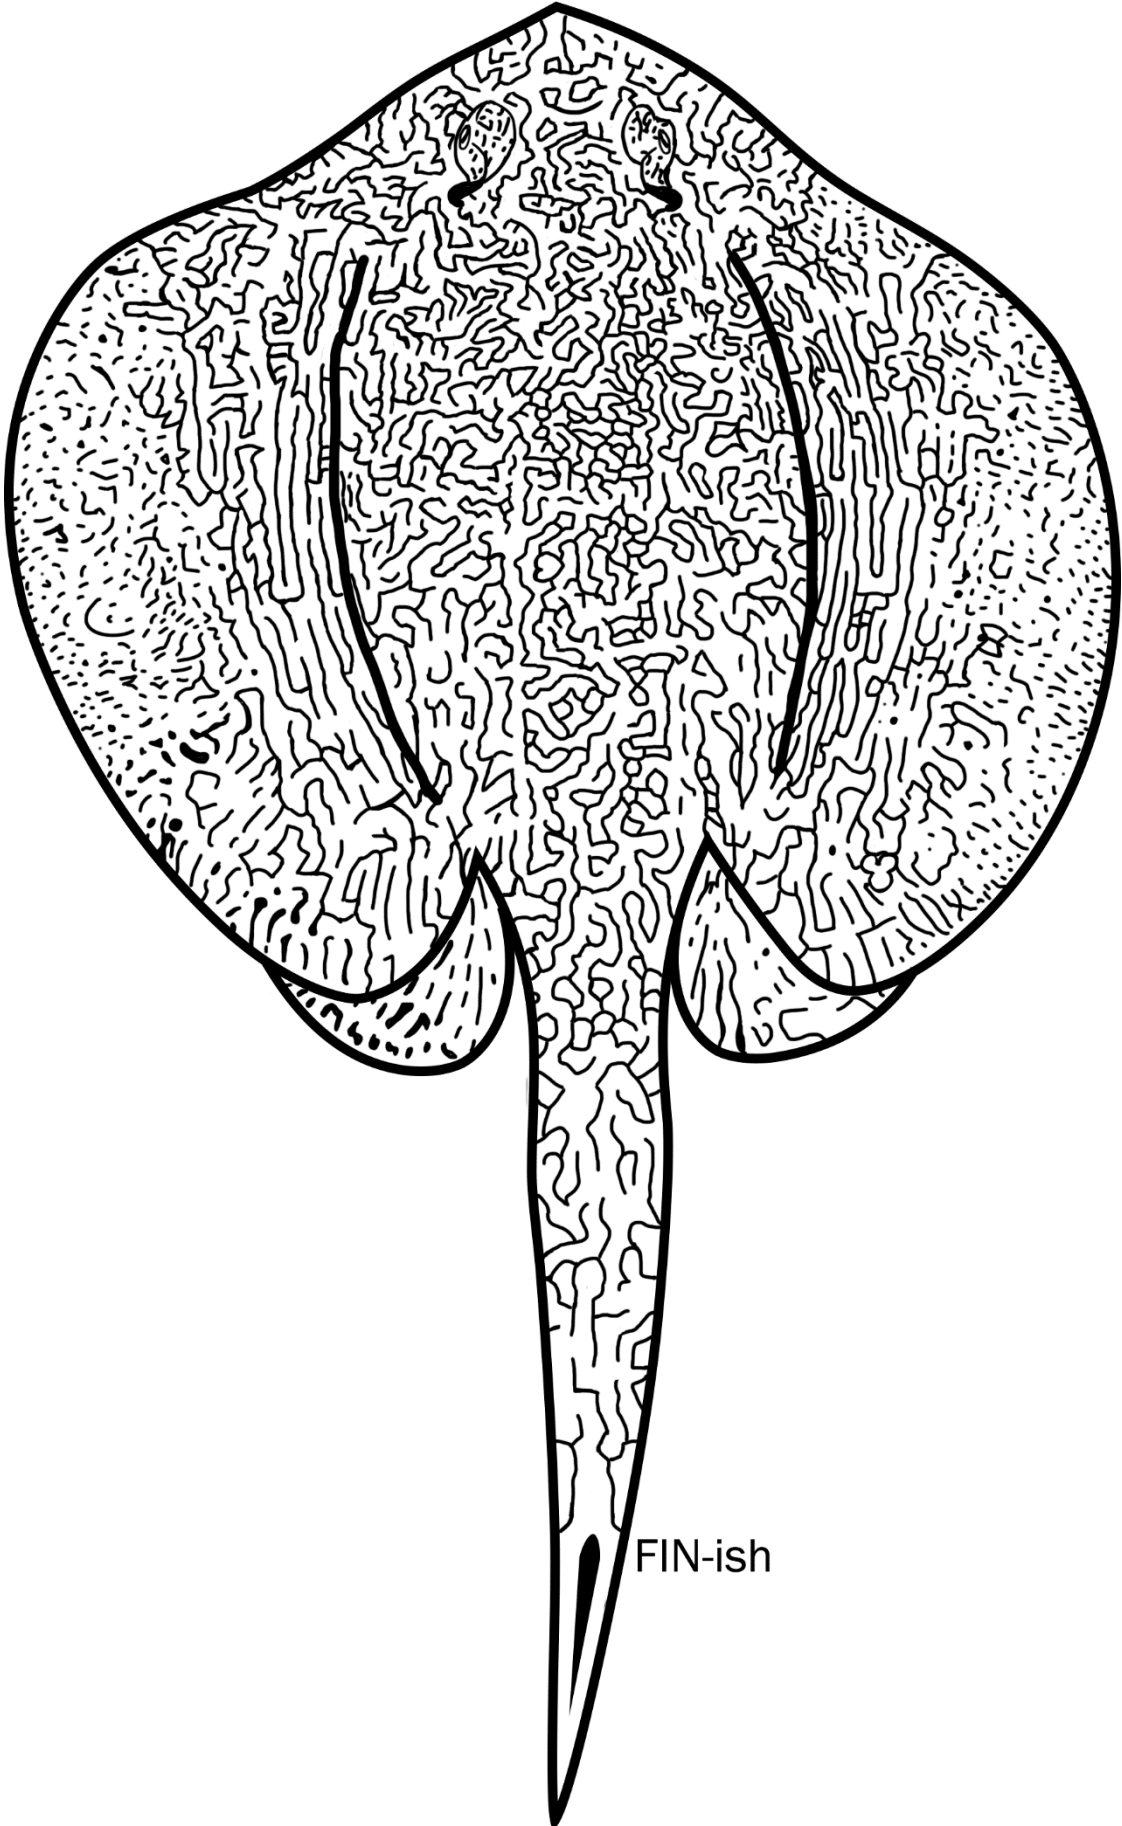

Stingrays are excellent at hiding under the sand. They have amazing patterns to help them camouflage with the ocean floor. Their eyes are on the top of their head, so they can spot predators while remaining hidden. If stingrays are found in their hiding spot, they can use their venomous stingers to defend themselves.

The Explore the Yellow Stingray Camouflage

- The following maze is based on the camouflage of Yellow Stingray (pictured below).
- Navigate the maze by starting at the snout (or rostrum) and winding your way to the stinger on the tail.
- You can also use it as a coloring page or look for the 6 hidden pictures.
- Can you find: a fish, a smile, a mouse, a heart, a butterfly, and a disco dancer?
